Lindblom & Lindblom, the noise rock sibling duo return with a second album of intense, layered instrumental guitar driven music. The Red Rail is filled with cues from the freeform skronk of no-wave and the angular riffs of the Touch & Go roster, combining these influences with an interest in kraut, jazz and drone to create a cohesive and wide-ranging sound. Fans of Slint, Don Caballero and Jesus Lizard should feel right at home. This is instrumental music that refuses to be relegated to the background.
