Makka PM's Bara kust is a minimalist modular synth album out Friday December 11th on Nejelnet.

## About Bara kust

While the music on Bara kust is an expression of Makka PM's love for melodies and sound, the song titles are an attempt at capturing the beauty and danger of coasts, two facets of coasts that are unequally distributed among the human population. The link between the sounds and the words on the record is the materials used, with the make noise o-coast presiding as the key conductor of the modulations and undulations.
